

# WF906 Series Vandal Resistant Aisle Light

8

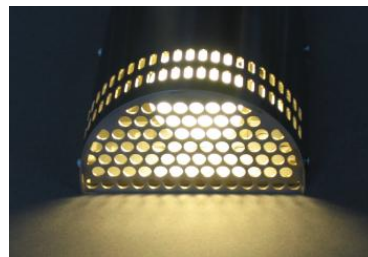

## FEATURES (all models):

- Natural finish 18 gauge stainless steel cover or custom color steel.
- All stainless steel fixture assembly (18 gauge type 304).
- Stainless steel tamper proof screws and mounting hardware option.
- Mounts to a standard 2x4, 4x4, or octagonal electrical box.
- Can be used as a uplight or downlight.
- Optimized for use with screw-in compact fluorescent bulbs.
- Low profile for Americans With Disabilities Act (ADA) compliance.
- 5.5 H x 4.5 W x 2.5 D (140 x 115 x 63.5mm)

Highly Reflective Interior

Heavy Duty 18 Gauge Grille Prevents Bulb Theft and Breakage.

Use as an Up Light or as a Down Light.

## Mounting Holes For:

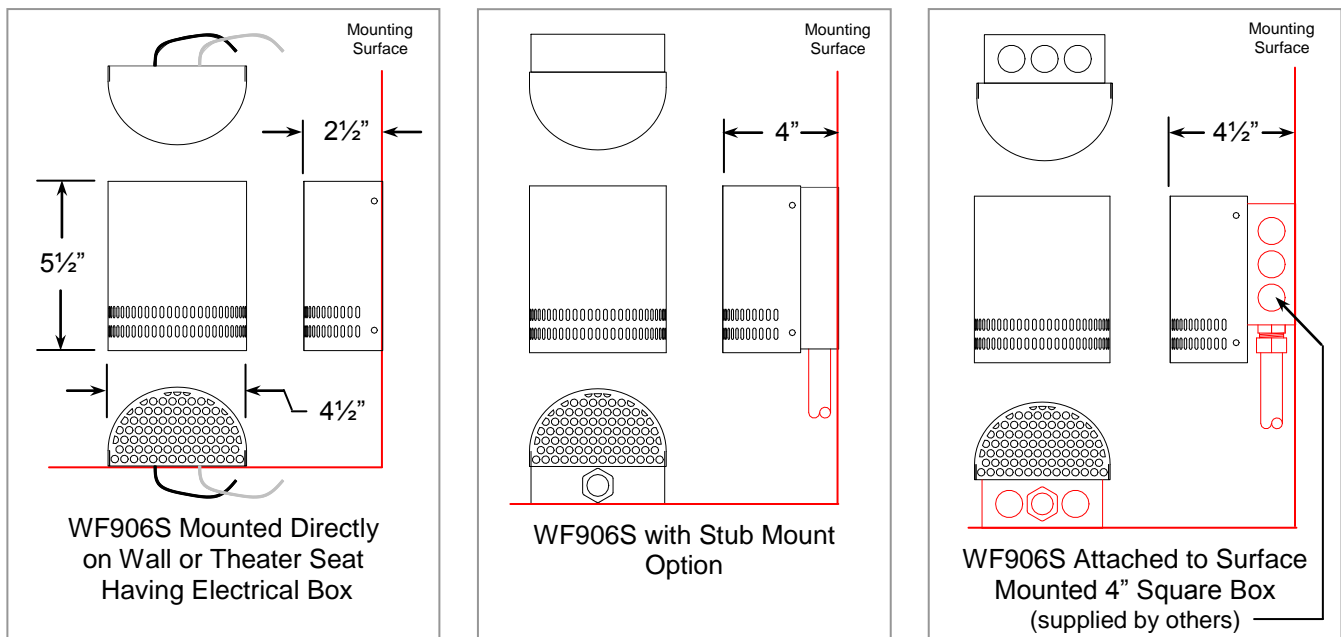

- 2"x4" Electrical Box
- 4" Square Electrical Box
- Single Gang Plaster Ring
- Double Gang Plaster Ring
- 4" Octagon Electrical Box

Lumenelle™

## BENEFITS:

- Designed specifically for installation in Chicago Public Schools. All Lumenelle fixtures and their major components are manufactured in the Chicago area for enhanced customer support.
- **COMPACT:** Standard fixture is 4½ inches wide, 5½ inches wide, and only 2½ inches deep. Stub mount option adds only 1¼ inches to the overall depth.
- **EASE OF INSTALLATION:**
  - Standard fixture mounts directly to 2x4, 2x3, 4x4, and 4" octagonal boxes or single and double gang plaster rings.
  - Stub mount option is also designed to make the WF906 a "drop in" for many of the obsolete fixtures it is intended to replace in remodeling projects and increases the probability of reusing existing mounting holes and existing conduit stubs saving labor.
- **RUGGED:** All stainless steel construction for durability and corrosion resistance. Porcelain socket will not become brittle with heat and age as plastic sockets typically do.
- **ENHANCED SAFETY:**
  - Two separate light beams from the same fixture - one to illuminate the floor, the other to act as a safety side marker light.
  - Wide beam pattern for effective lighting at low mounting heights. When mounted to theater seating, the wide beam pattern also improves visibility of theater seat legs reducing trip hazard.
  - Rounded surface to reduce injury potential should someone accidentally bump into it.
- **VERSATILE / REDUCED LAMP MAINTENANCE COST:** Optimized for use with screw-in compact fluorescent bulbs. This provides maximum light level flexibility unlike most compact fluorescent fixtures that allow only one light level due to lamp / socket / ballast lock-in.

## DIMENSIONS (shown with typical mounting options):

## MODELS:

- WF906SS - Standard Model w/o Stub Adapter - Natural Stainless Steel
- WF906SS-SA - Standard Model w/ Stub Adapter - Natural Stainless Steel
- WF906BZ - Standard Model w/o Stub Adapter - Bronze Colored Steel
